Looking for

A graphic design internship during summer or winter break which counts for course requirements in the field (120 hours).

Also

Considering paid summer entry-level work in programming, or any related paid position, to gain experience and save money.

Of Particular Interest

Mobile programming has been a rewarding experience; combining graphic design to object-oriented programming is challenging but fun.

Web design is a skill that I enjoy sharpening, having made many successive personal websites with different designs.

Hobbies

Musical compositions are the achievement I am most proud of. Have participated in orchestra, at home and at college (play the violin and the piano). Have also participated in literary contests, winning 2nd place.

Enjoy doing woodwork; have also done construction work at home and for friends. Making things is fun!

Volunteer Work

Have participated in evangelization activities at home. Am the co-leader for Shalom Door-to-door college outreach. Want people to be witnessed to so they can have Jesus Christ as Saviour, and grow in their personal faith, teach themselves the Bible, and affect others.

Dates Available

May 17 to July 25, 2018

Contact Me

denis.g.labrecque@gmail.com

Studies
Pensacola Christian College
Pensacola, Florida
Grade Point Average
3.42 : 4.0
Junior Level
3rd year being completed
85 credits earned so far

2015-2020

Summer Work
Colabor
Boucherville, Québec

2016-2017

Bachelor of Science in Computer Information Systems Bachelor of Science in Graphic Design

Mobile Programming

Developed for Android using Java and C#, programmed a cross-platform application, assessed the feasibility of creating a new realty application, and worked both alone and in a team according to the model-view-controller pattern.

.NET Programming

Created Universal Windows Platform applications in C# using the .NET framework.

Object-oriented Programming and Design

Examined and understood the principles of object-oriented programming in C++ when evaluated according to severe guidelines and capacity to follow a rigid format.

Computer Graphics Programming

Created computer games in teams using Unity, and assessed topics such as 2D sprites, 3D modelling, animation, shaders, and QBasic.

Graphic Design I & II

Exercised problem-solving skills while creating logos and combination marks, a company identity, vector illustrations, brochures, and food packaging, along with other regular assignments.

Principles of Painting

Learned to paint realistically in watercolour, acrylic, and mixed media.

Principles of Drawing

Used pencil to draw realistically and learn visual modelling, shading, and proportion. Extreme scrutiny in correct values and exact negative space.

Order Selector

Night Shift

Completed orders for clients by filling crates using electric pallet jacks and Vocollect headsets. Never missed work, and was both invited to come back and recommended for disciplined and hard work by the supervisor. Exceeded the required average picking speed.

Personal Qualifications

Bilingual in English and in French

Programming Languages

comfortable using C#, C++, C, JavaScript, XML, HTML, CSS
have also used XAML, PHP, JSON

Experience in Applications

Visual Studio, Android Studio, Illustrator, InDesign, Photoshop, Finale, Blender, Unity

Sincere greetings:

I am presently seeking a graphic design internship.

You should consider hiring me because I learn well on my own; for example, I taught myself violin playing, musical composition, and web design; this shows capacity to work alone. I am also perseverant, and strive to be always truthful. I worked two summers as order selector: my boss invited me to come back at any time, and also recommended me for being consistent and dedicated to work.

This summer is a great one to complete my required graphic design internship. Because of wedding plans, I am available from the beginning of the summer break (May 17) until just before the marriage (to occur in Canada on July 26th). Therefore, I am ready to assume any intern, summer, temporary, paid, or unpaid position in graphic design. The scholastic requirements for this internship are 120 hours of supervised work, or three full weeks.

If you have an opportunity for me, I am thankful for it. I will come curious about how you do things, open-minded, ready to learn, and ready to work for your needs.

If you do not have an opportunity, thank you still for your kind attention. Please do keep my contact information if you believe such an opportunity will arise later!

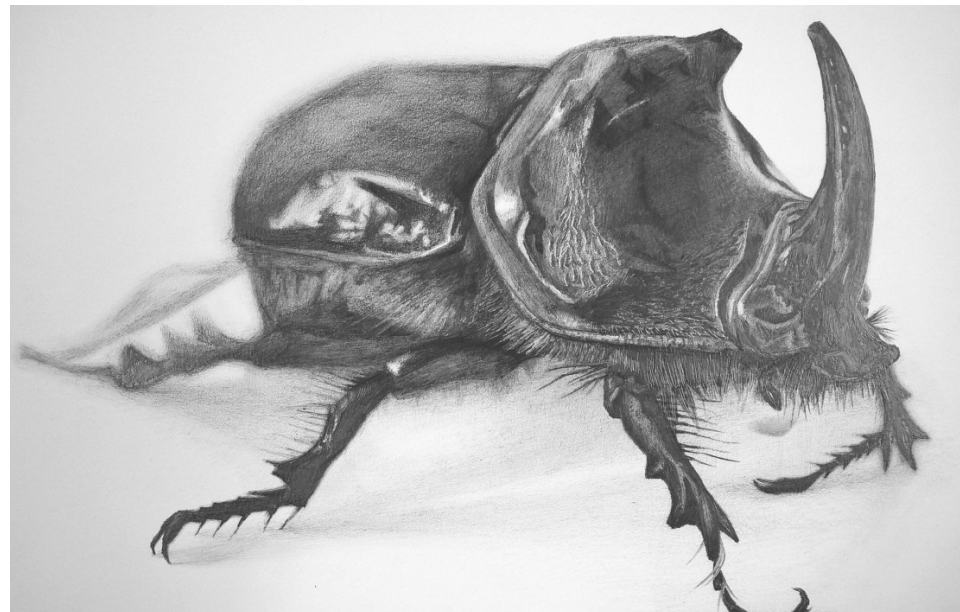

Sincerely,

Denis Labrecque
